

## Fineboring Tools

Radial adjustment  $\mu$ m-accurate adjustable

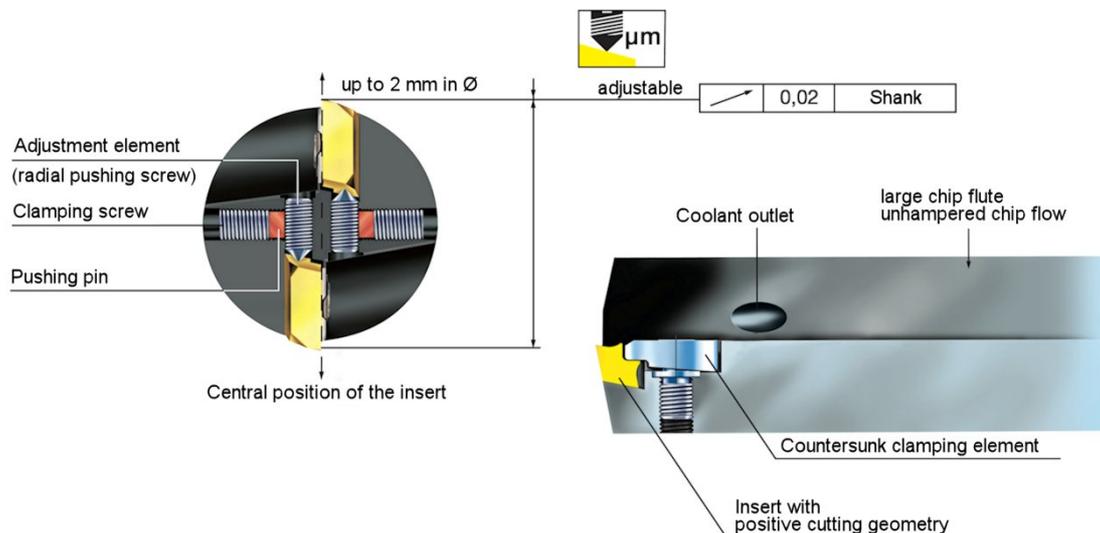

**HOLLFELDER-GÜHRING CUTTING TOOLS** offers the possibility to adjust all inserts in the finebores  $\mu$ m-accurate in diameter by means of the radial screw adjustment. This high-performance tooling system is both suitable for various machining tasks and a wide variety of materials.

- Highly precise, special shaped pocket seat for excellent insert guidance
- Precision-ground insert
- Radial screw for  $\mu$ m-accurate adjustment
- Easy adjustment while inserts are clamped
- Easy handling
- Large range of adjustment

Similar to the fineboring tools with tapered screw adjustment are the robust clamping element located in the chip flute, the large chip flutes and an internal coolant supply. These aforementioned design elements are responsible for an excellent chip evacuation even when long-chipping material is machined.
