

Where production processes that require cleaning or deoiling, we are the **right** choice.
Recycling instead of high disposal costs as well as cost reductions through more effective cleaning.

Trenntechnik & Anlagenbau GmbH

Industrial Centrifuges

The Problem :

Fully automatic solutions are too expensive for small amounts of long tufted swarf of various kind.

Our batch centrifuges offer an alternative.

Our Solution :

Our batch centrifuges are outstandingly suitable for drying long and short swarf of any kind (metal, plastic, in tufts or short) and in addition also for drying individual components and bulk material.

They are available with attached slewing crane, chain hoist, heating, speed regulator cleaning unit and tanks.

Manual Centrifuges*	MZ300	MZ400	MZ500	MZ600	MZ700
Drum diameter, mm	300	400	500	600	700
Height, mm	250	300	350	350	380
Charging weight, kg	35	50	100	150	150
Drum volume, ltr	15	30	65	100	145
Drum speed, rpm	1500	1000	1000	750	750
Batches / h	10-12	10	10	10	10

* with a steel insert drum, suitable for all types of swarf

MZ 500/600 L: with light insert drum (trouble-free handling without a crane) for long and light swarf (aluminium, titanium, plastic)

MZ 500/600 K: barrel insert for perforated, rectangular cases for deoiling bulk goods (screws, bolts)

**All models are available with attached slewing crane, with chain hoist and with heating.
