

Where production processes that require cleaning or deoiling, we are the **right** choice.
Recycling instead of high disposal costs as well as cost reductions through more effective cleaning.

Trenntechnik & Anlagenbau GmbH

Skimmy Oil Separator

The Problem :

Watery emulsions are destroyed when a film of external oils appears on the surface.

Bacteria form in the emulsion, in a short time it must be replaced.

Our Solution :

Skimmy oil separators, mobile or stationary.

- ★ Continuous cleaning in bypass
- ★ Floats permit the cleaning of the whole surface (not just particular points)
- ★ No machine down times
- ★ Safe operation through level monitoring
- ★ Simple operation
- ★ Longer use cycles for your cooling lubricants, tools and wash liquids
- ★ Cleaner and healthy work environment

Oil separation made easy !!!

Skimmy Oil Separator	
Throughput ltr./h	600 - 800
Length x width x height mm	850 x 500 x 1200
Material	PE, PP, Stainless steel
